# Holocaust Trauma

## Psychological Effects and Treatment

*That attempt at the systematic destruction of an entire people falls like a shadow on the history of Europe and the whole world; it is a crime which will forever darken the history of humanity.*

—Pope John Paul II

**Natan P.F. Kellermann, PhD**

**Natan P. F. Kellermann, PhD.** is a clinical psychologist, an international trainer of psychodrama and sociodrama and an author of books and papers on various subjects. He was the chief clinical psychologist of AMCHA/Jerusalem between 1996–2000, its executive director between 2001–2004, and its project development director until the end of 2011. For more than ten years, he lectured at the International School for Holocaust Studies in Yad Vashem. He was born in Sweden, but lives in Israel with his family since 1980. He is the son of Holocaust survivors. Natan Kellerman is the author of a book called Holocaust Trauma – Psychological Effects and Treatment. The study is a comprehensive overview of the long-term psychological effects of Holocaust trauma. It covers not only the direct effects on the actual survivors and the transmission effects upon the offspring, but also the collective effects upon other affected populations. It also suggests various possible intervention approaches to deal with such long-term effects of major trauma upon individuals, groups and societies that can be generalized to other similar traumatic events.
